Erste Erfahrungen mit dem AMO Sovereign Upgrade with ICE and CASE

**G. U. Auffarth,
D. Vucic,
M. J. Sanchez,
Y. Nishi,
M. P. Holzer**

**Unuversitäts-Augenklinik Heidelberg
Direktor: Prof.Dr.H.E.Völcker**

Classical AMO WhiteStar™ Microburst Technology

Temperaturmessung mit Infrarot Thermotopographie
während Whitestar sehr geringe Werte

G.U.Auffarth

WhiteStar™ ICE - Overview

Neue Verbesserungen bei Phaco:

- U/S Pulse shaping (MilliPulse)
- Chamber Stabilization Environment (CASE)

G.U.Auffarth,MD,PhD

WhiteStar™ ICE Pulse oder Phaco Shaping

Formveränderung der Pulse-Kurve

- Höherer Anstieg in den ersten 2 Millisekunden (“kick”)

WhiteStar™ Pulse Shaping Vorteile:

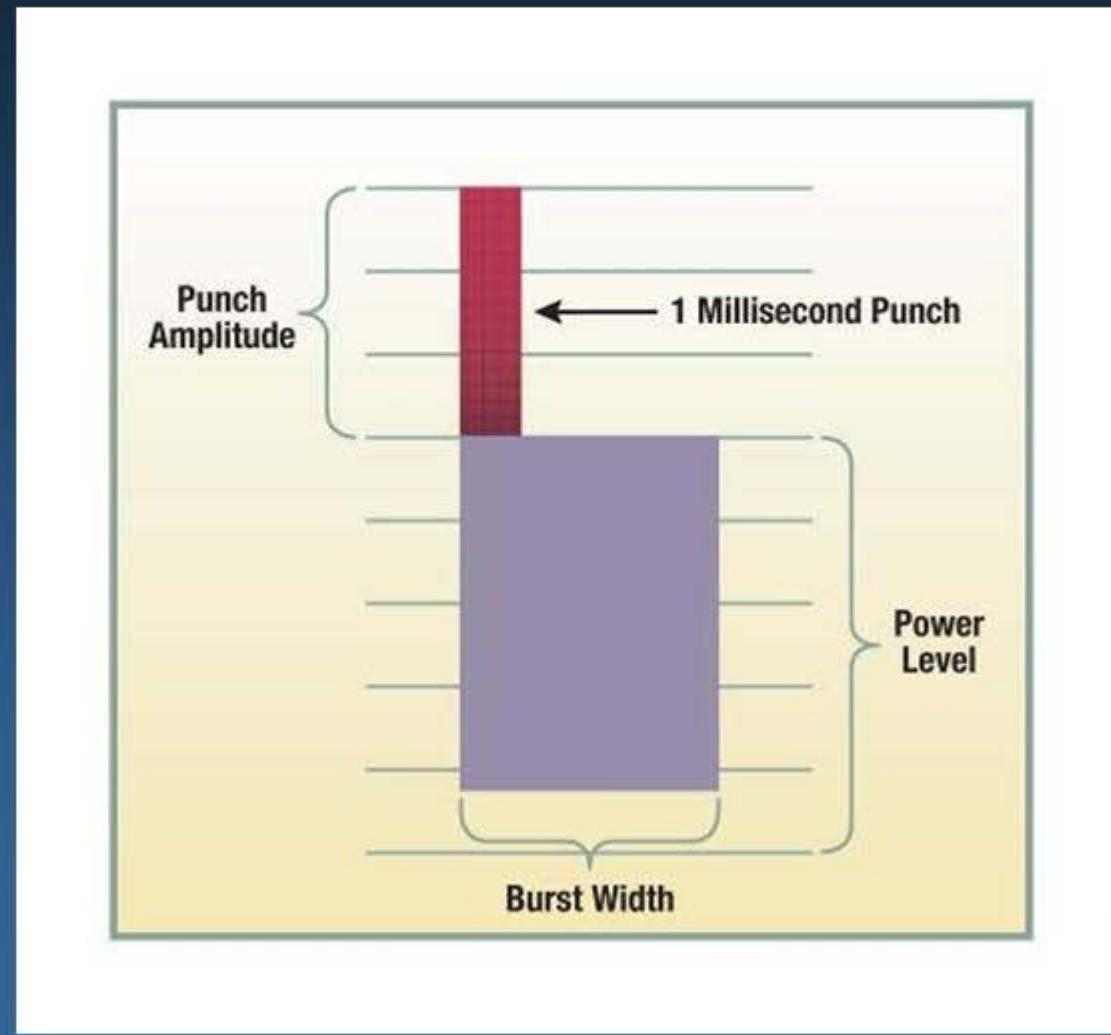

- Bessere Schneid Effektivität
- Mehr Kontrolle
- Mehr Flexibilität
- Verkürzung OP-Zeit

G.U.Auffarth

ICE Pulse

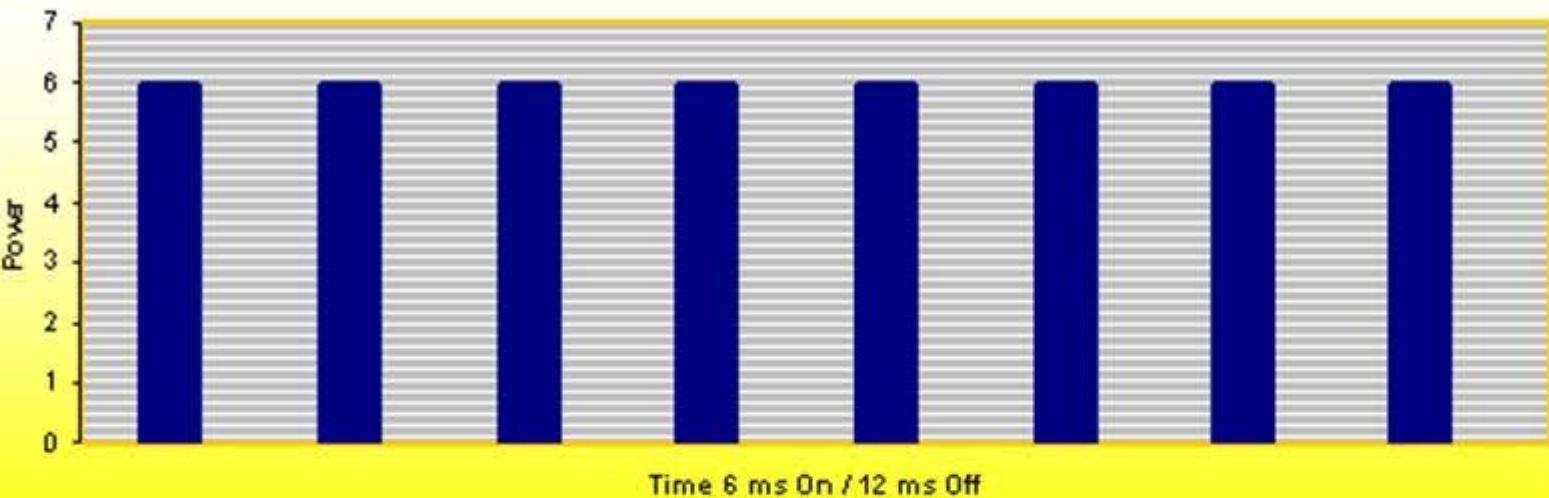

G.U.Auffarth

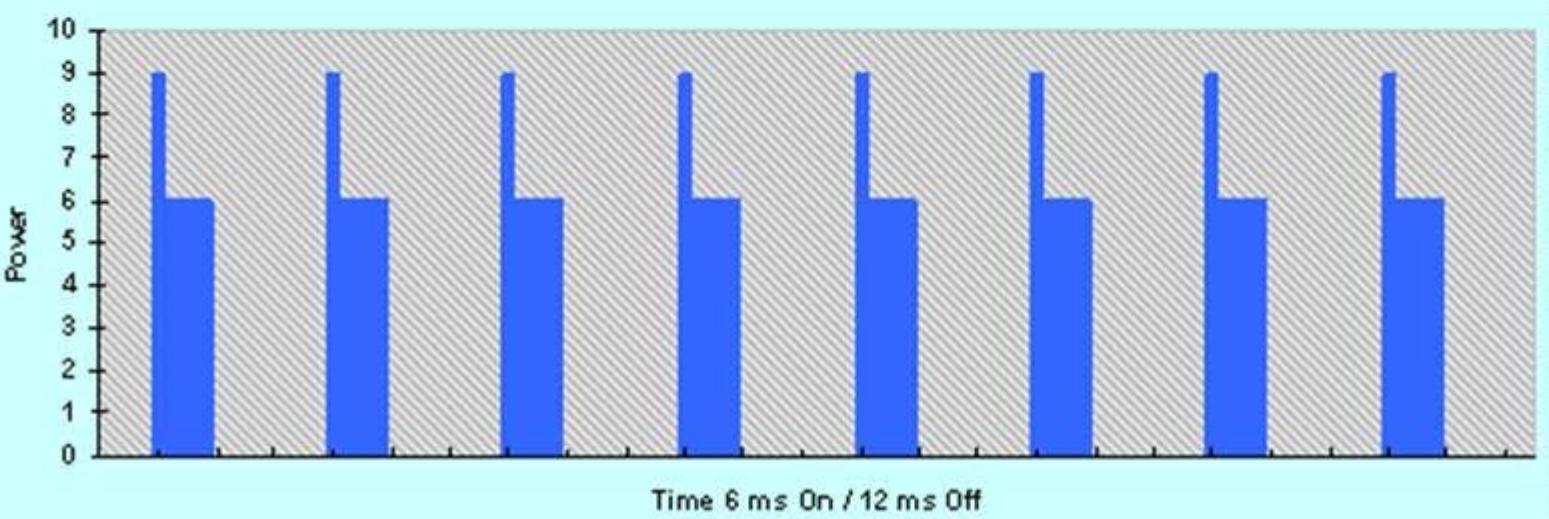

WhiteStar™ ICE Pulse Shaping

WhiteStar "Square" Continuous CIF

WhiteStar "Shaped" Continuous CIF

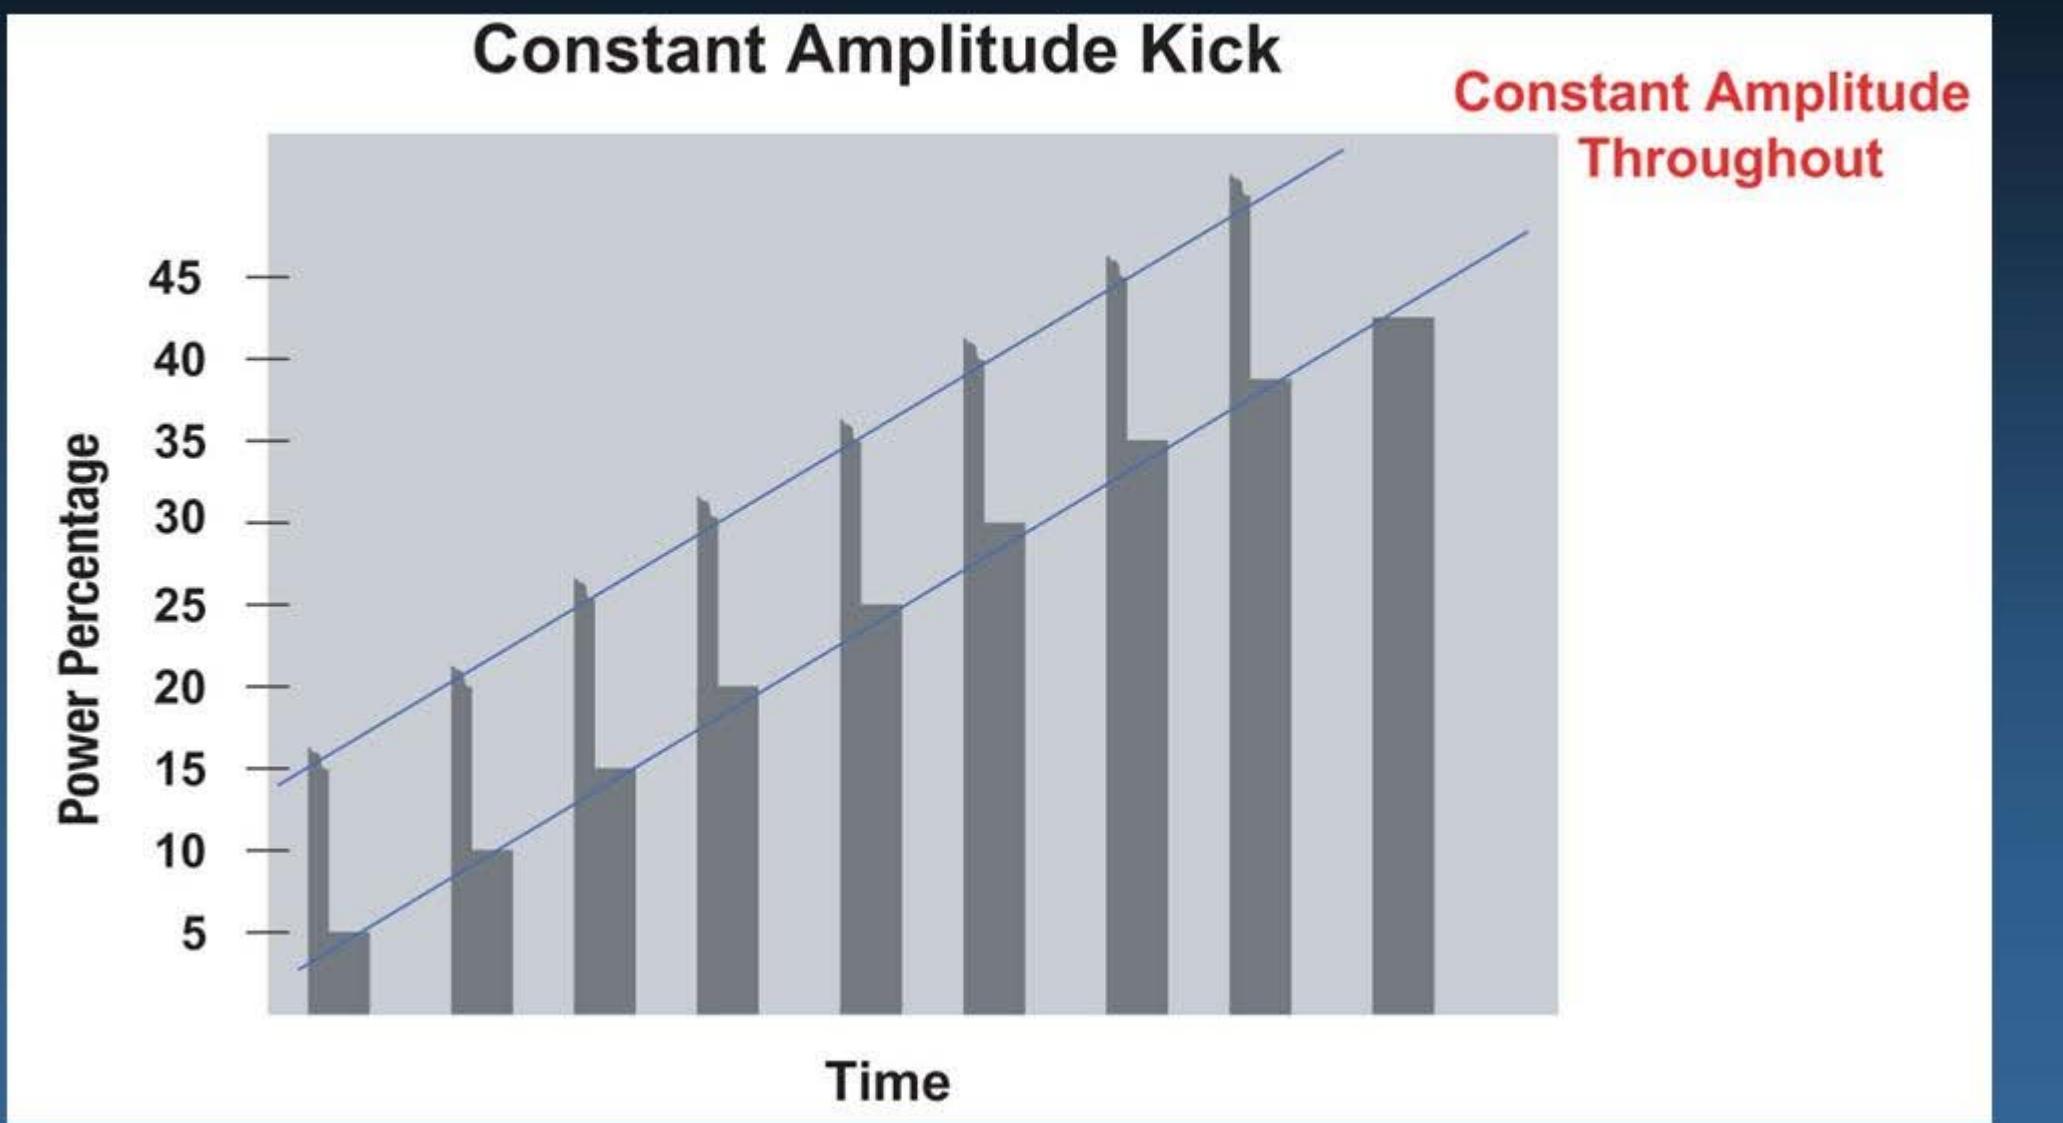

G.U.Auffarth,MD,PhD

WhiteStar™ ICE Millipulse

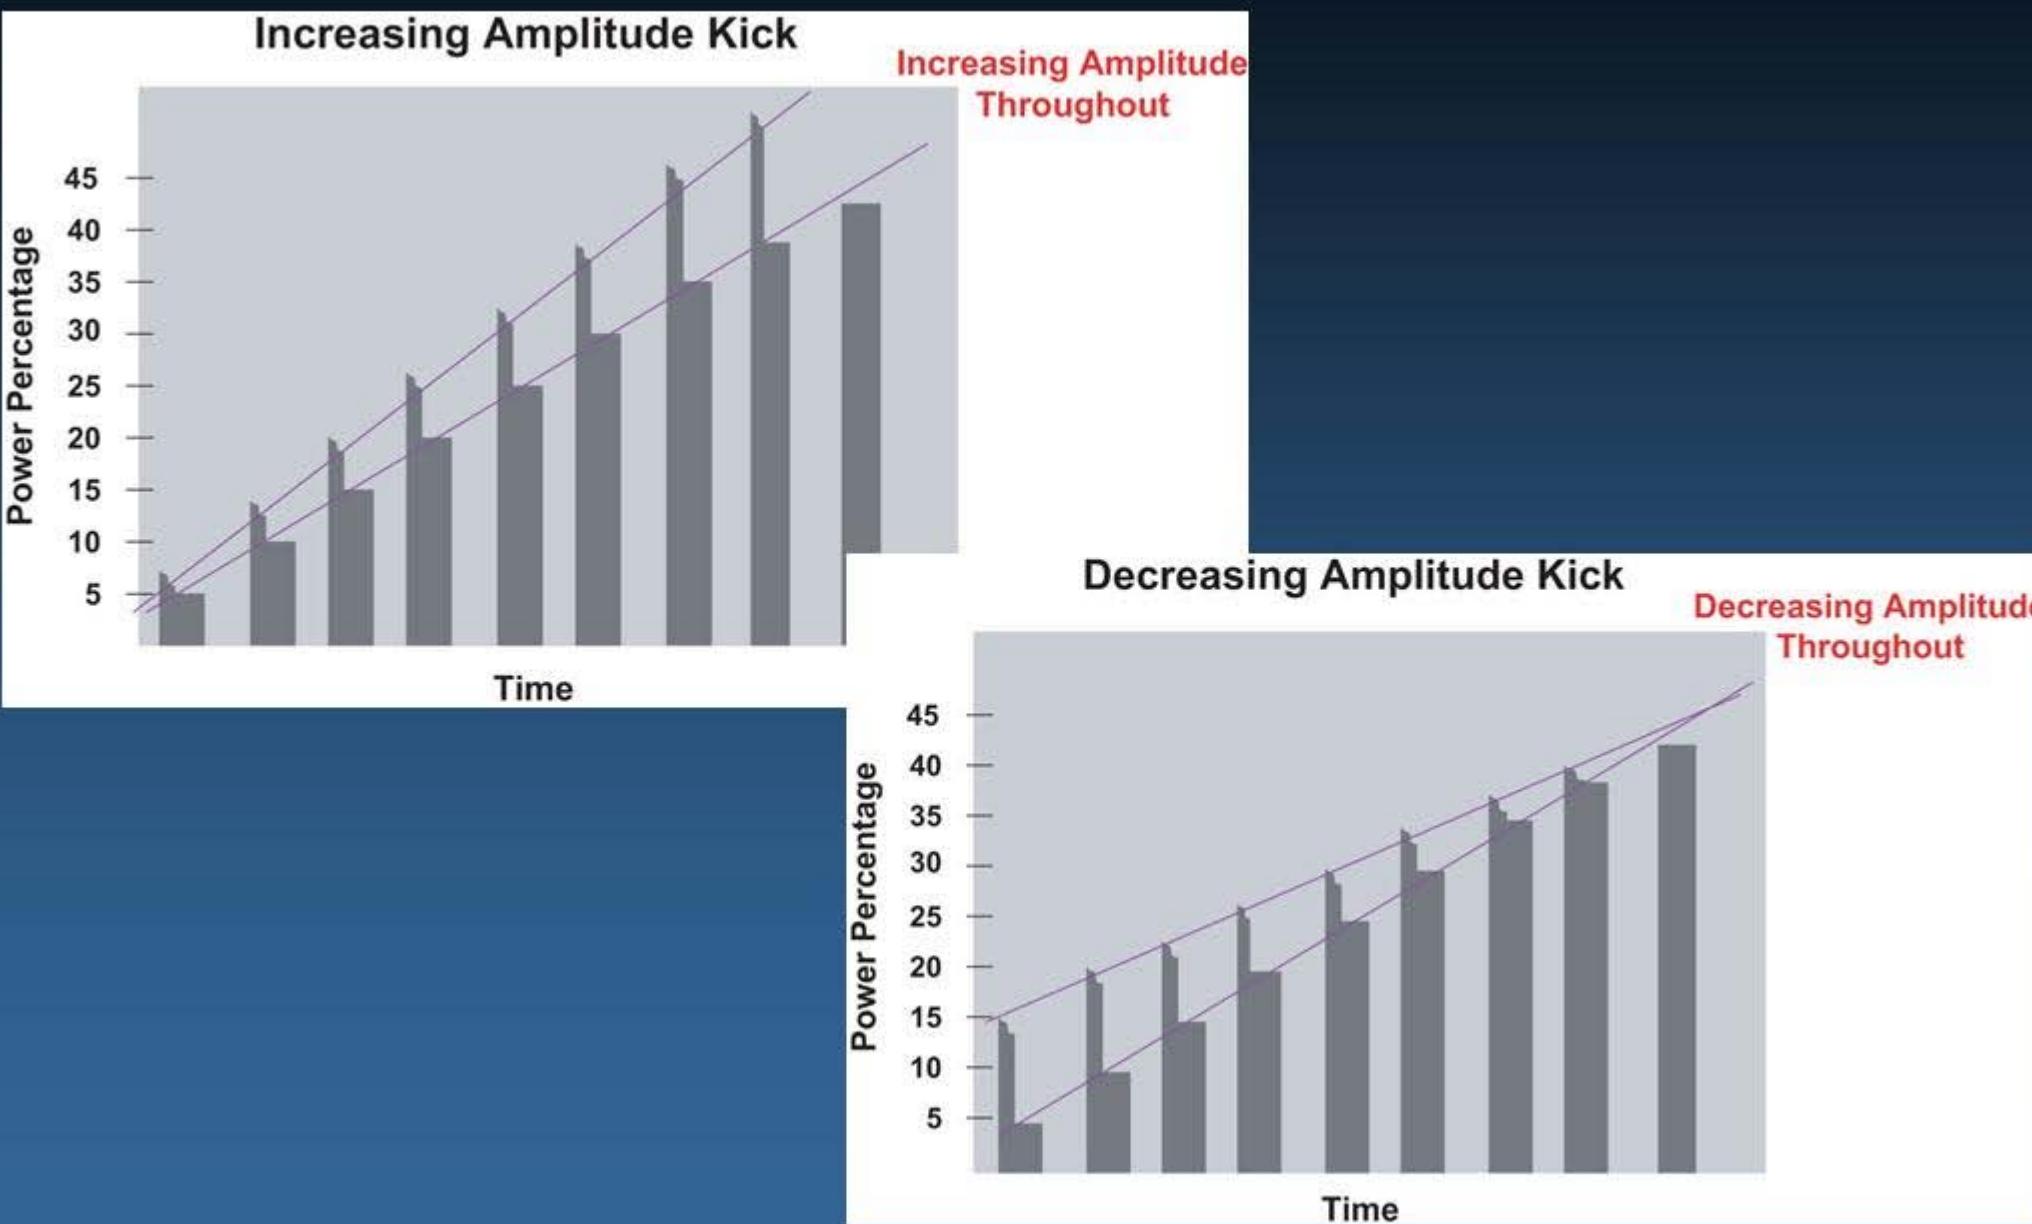

G.U.Auffarth,MD,PhD

WhiteStar™ ICE Millipulse

G.U.Auffarth,MD,PhD

Chamber Automated Stabilization Environment (CASE)

Enhanced Chamber Stability

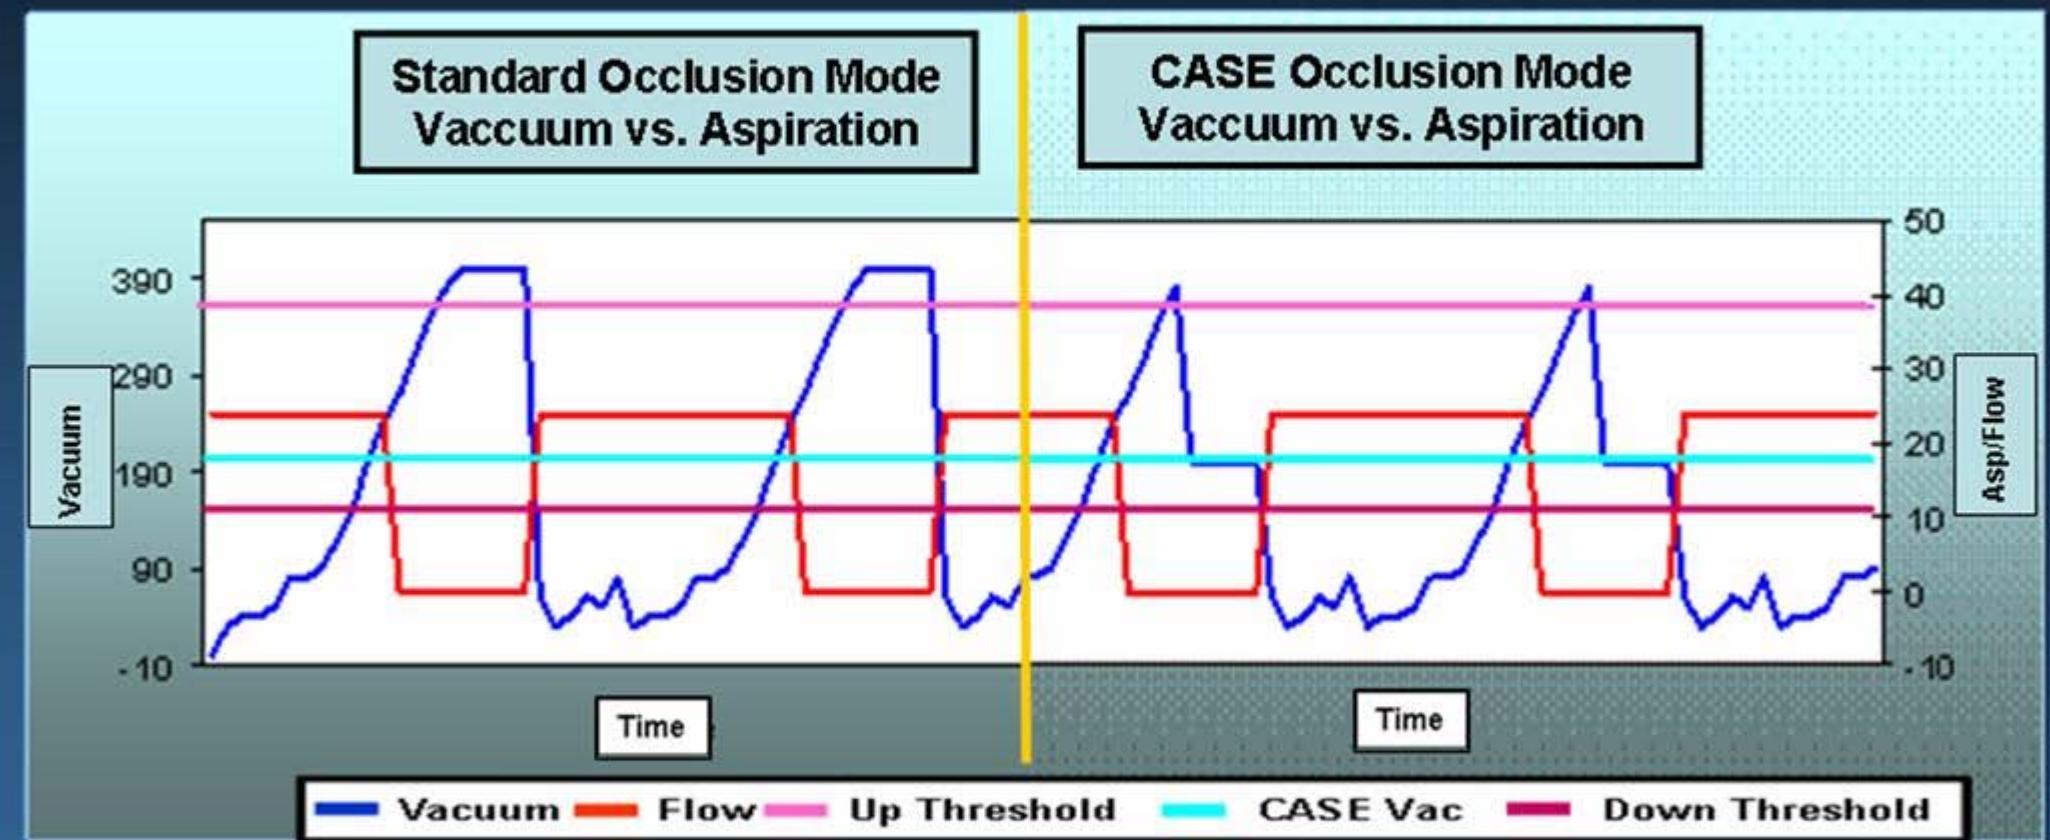

- Automatisierte Kontrolle und Monitoring des Vacuum
 - Monitor zeigt Vakuumstände
 - Reduziertes Vakuum bei Occlusion
 - Particle holding power
 - Reset Maximum Vacuum wenn Occlusion

Bei Occlusion kann die Software Phako-Power und Vakuum senken

G.U.Auffarth

Chamber Stabilization Environment (CASE)

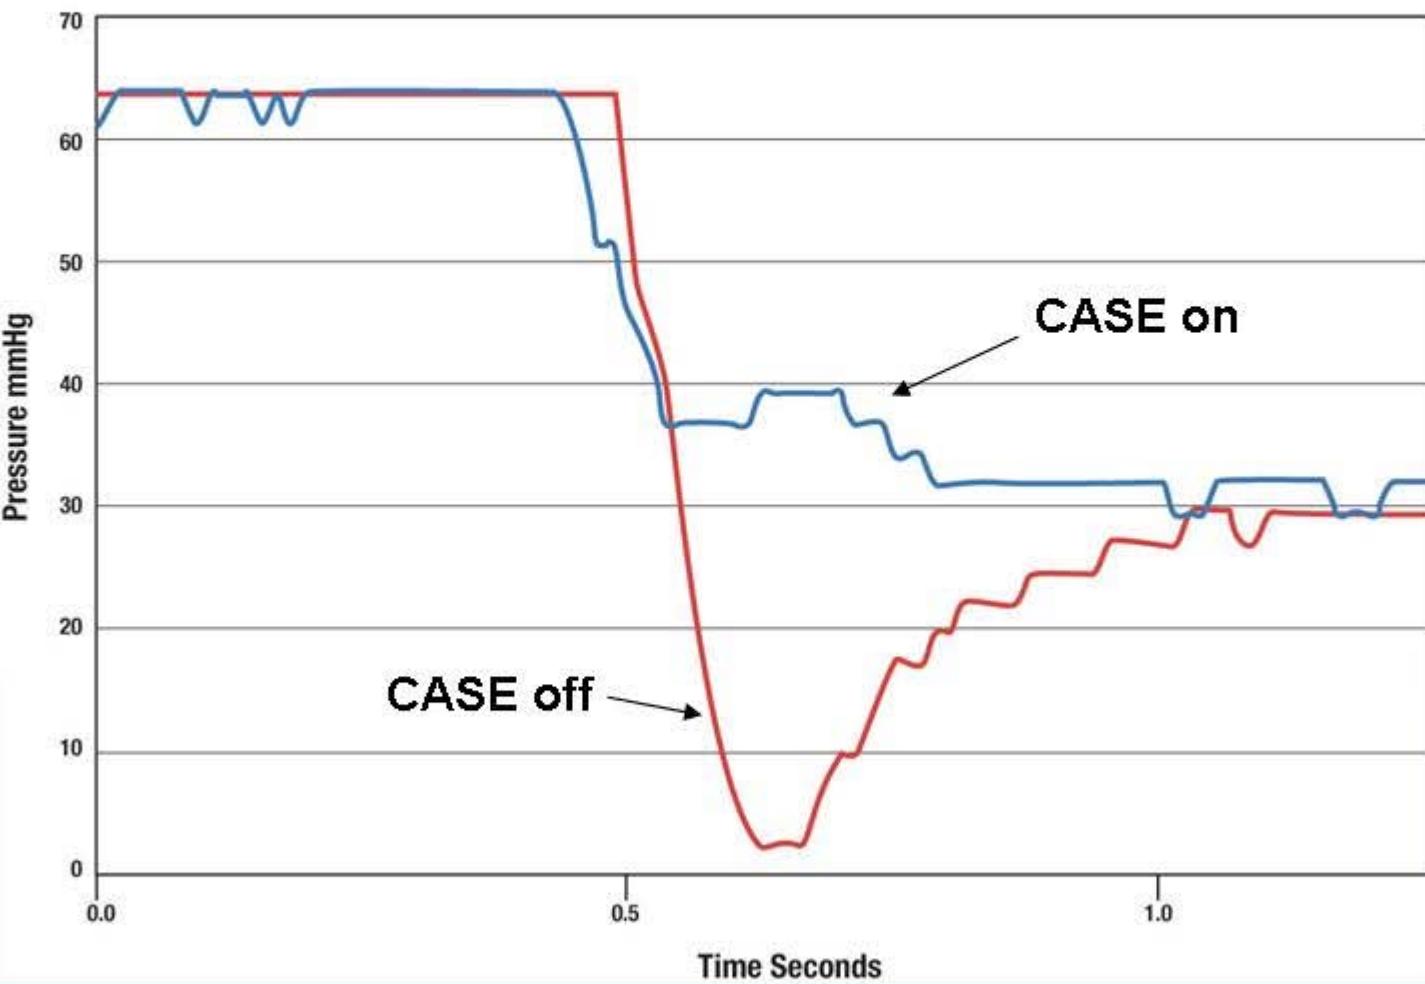

G.U.Auffarth,MD,PhD

WhiteStar™ ICE CASE

CASE Chamber Stabilization Test
500mmHg-45cc/min
Tubing Pack: OP050

G.U.Auffarth,MD,PhD

CASE Vorteile

- Geringerer post occlusion surge
- Geringere Reaktionszeit des Patienten
- Chirurgie sicherer bei hohem Vacuum
- Verbesserte VKT Stabilität bei MICS

G.U.Auffarth,MD,PhD

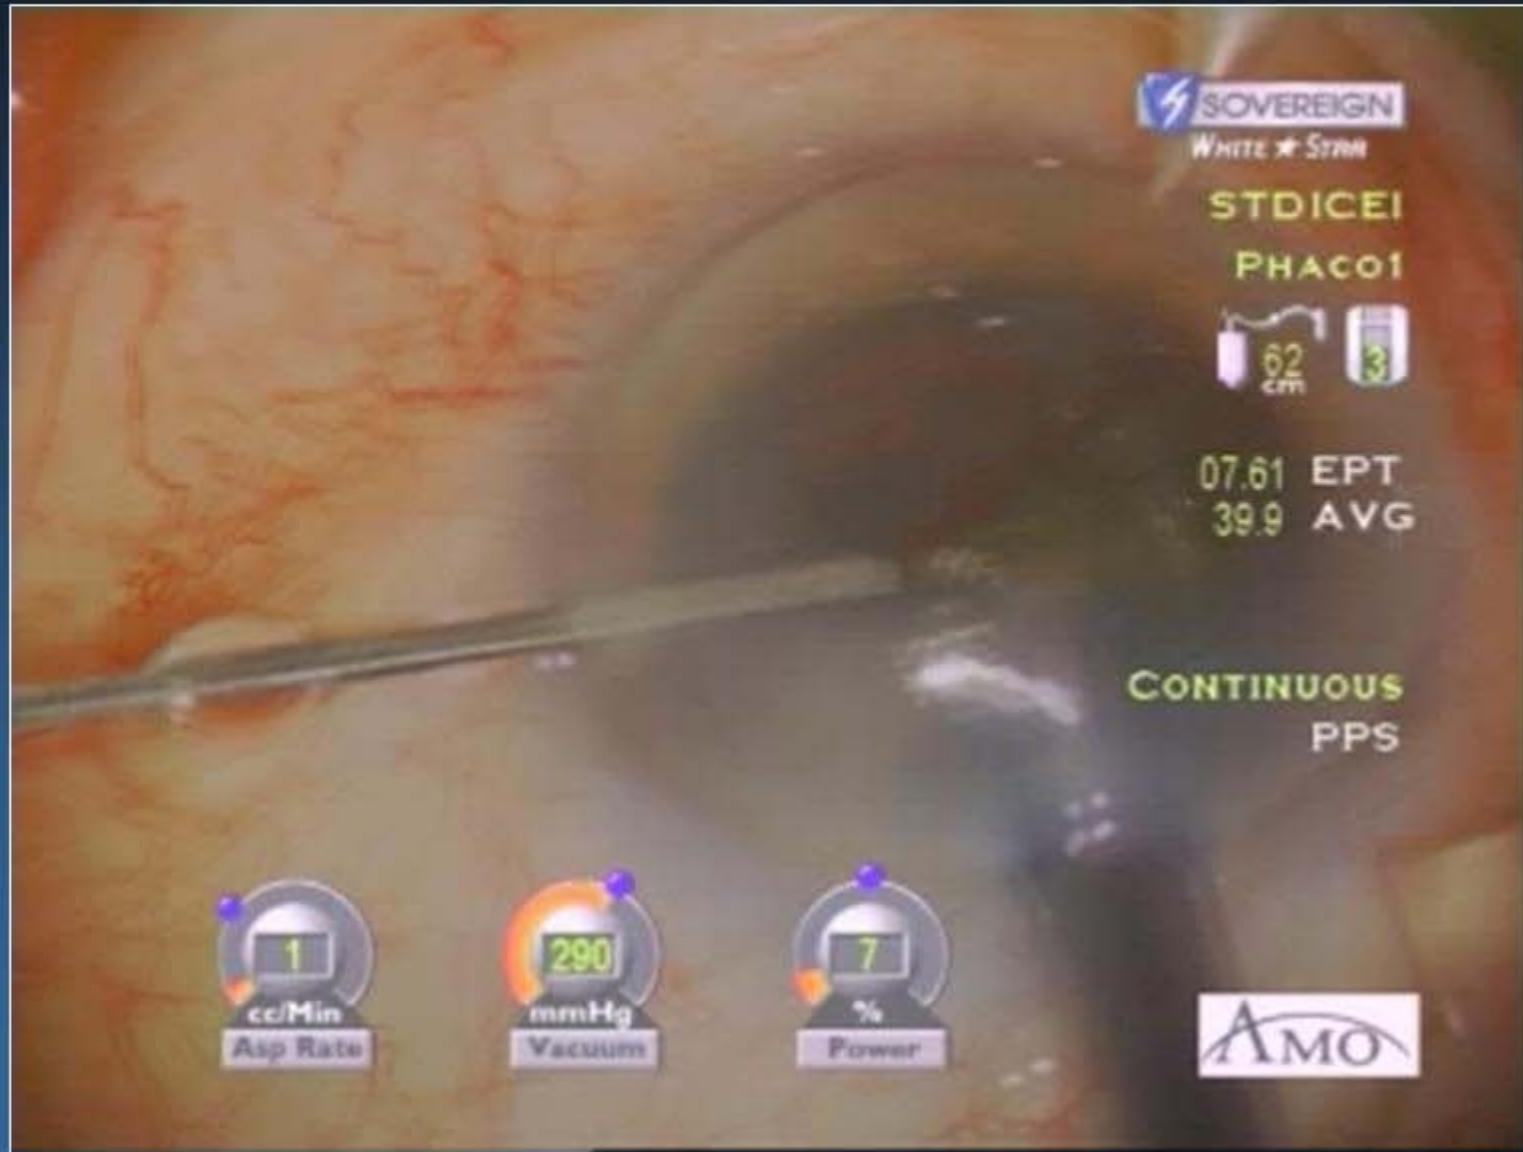

Erste Erfahrungen mit ICE/CASE

- Pre-Market-Release Studie
- GCP-Studie, Ethical committee controlled
- 32 Konsekutive Cataract OPs
- Patientenalter: 72 ± 12.2 Jahre
- Prä-OP Evaluation von:
 - Kataraktdichte I (Pentacam Scheimpflug System)
 - Kataraktdichte II (Subjective Scoring 0-4)
 - Flare (Kowa flaremeter)
 - ACD Volume (Pentacam Scheimpflug System)

G.U.Auffarth

PEX und ICE/CASE

G.U.Auffarth

+3-4 Nucleus mit ICE/CASE

G.U.Auffarth

Stabile Kammer (kein Surge mit CASE)

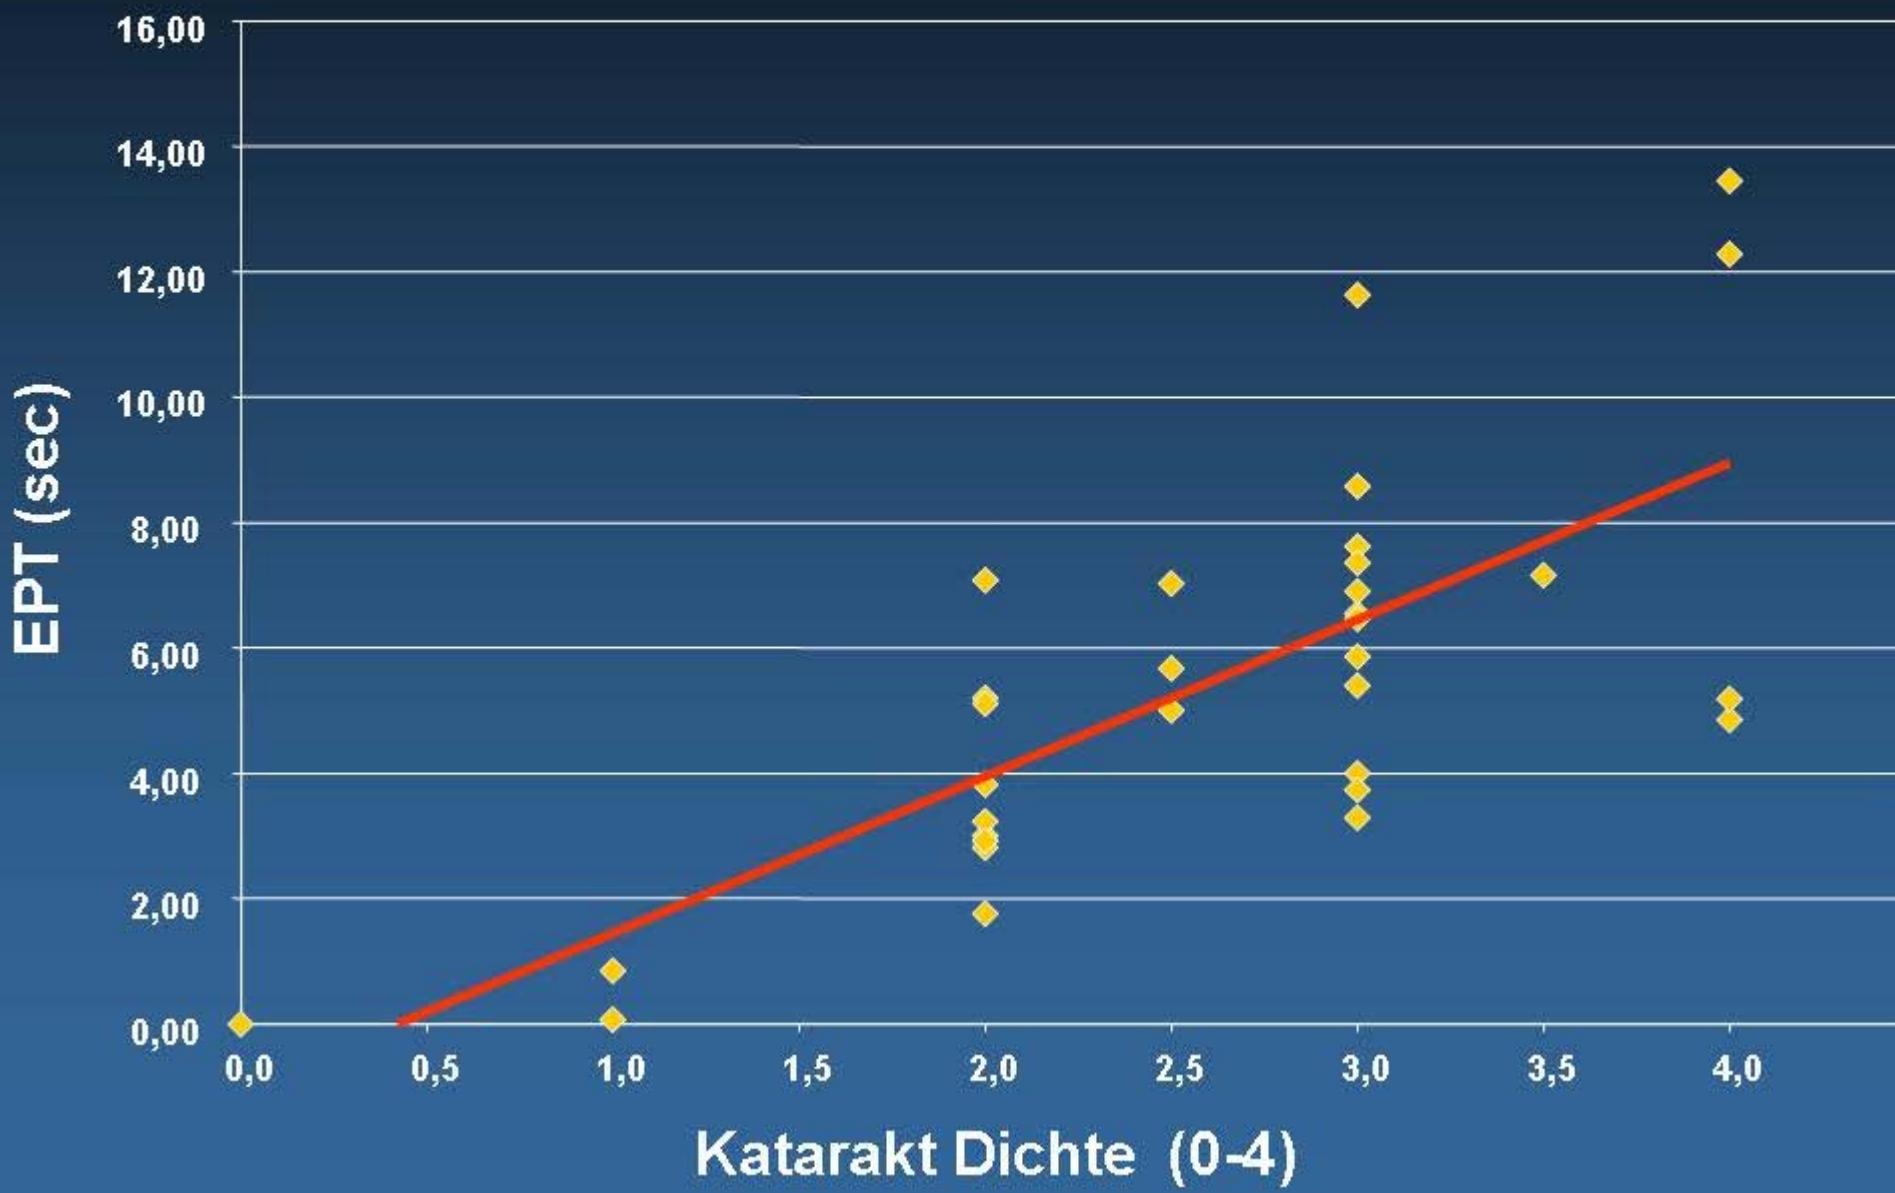

G.U.Auffarth,MD,PhD

EPT in Relation zur Kataraktdichte

AMO Sovereign ICE

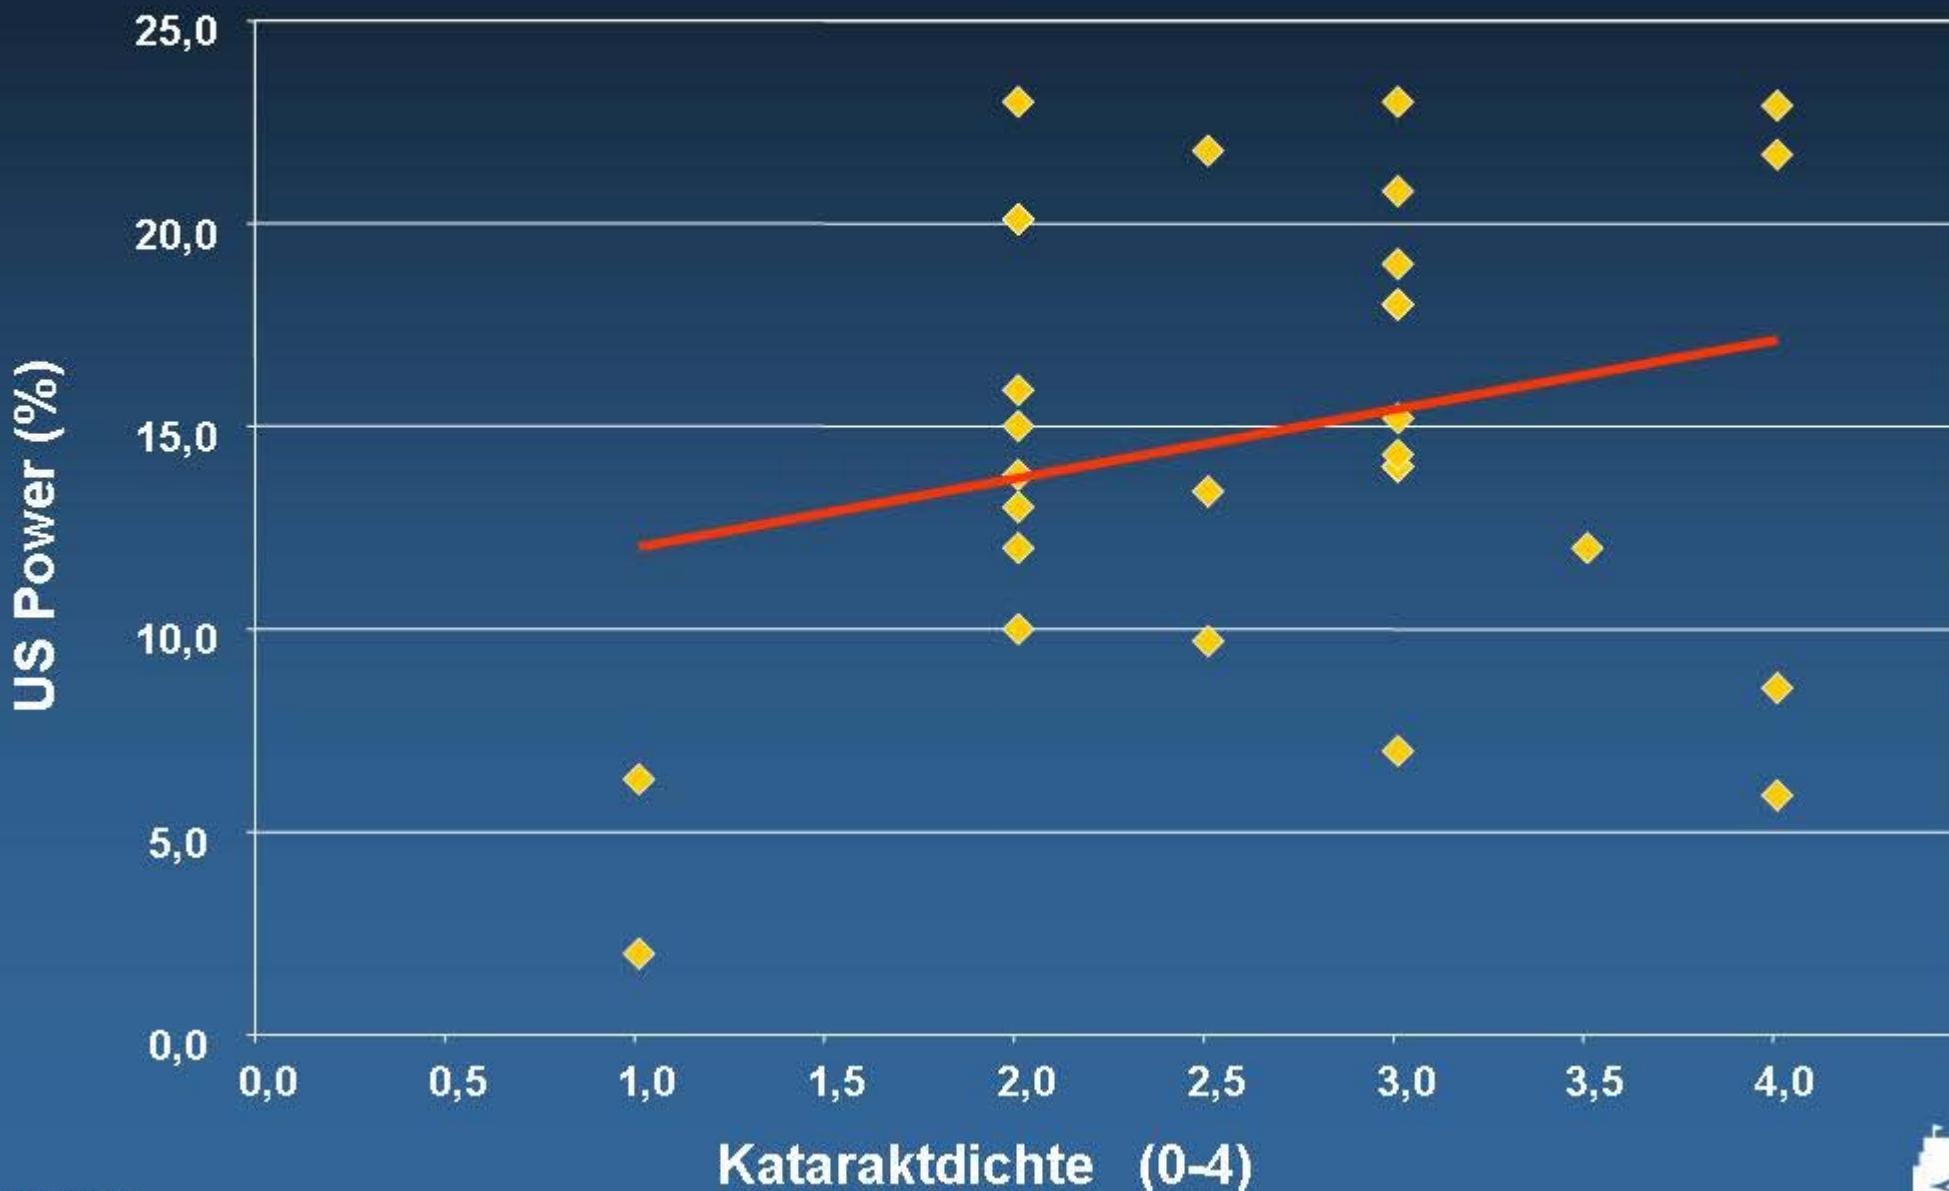

G.U.Auffarth

US-Power in relation to Kataraktdichte

AMO Sovereign ICE

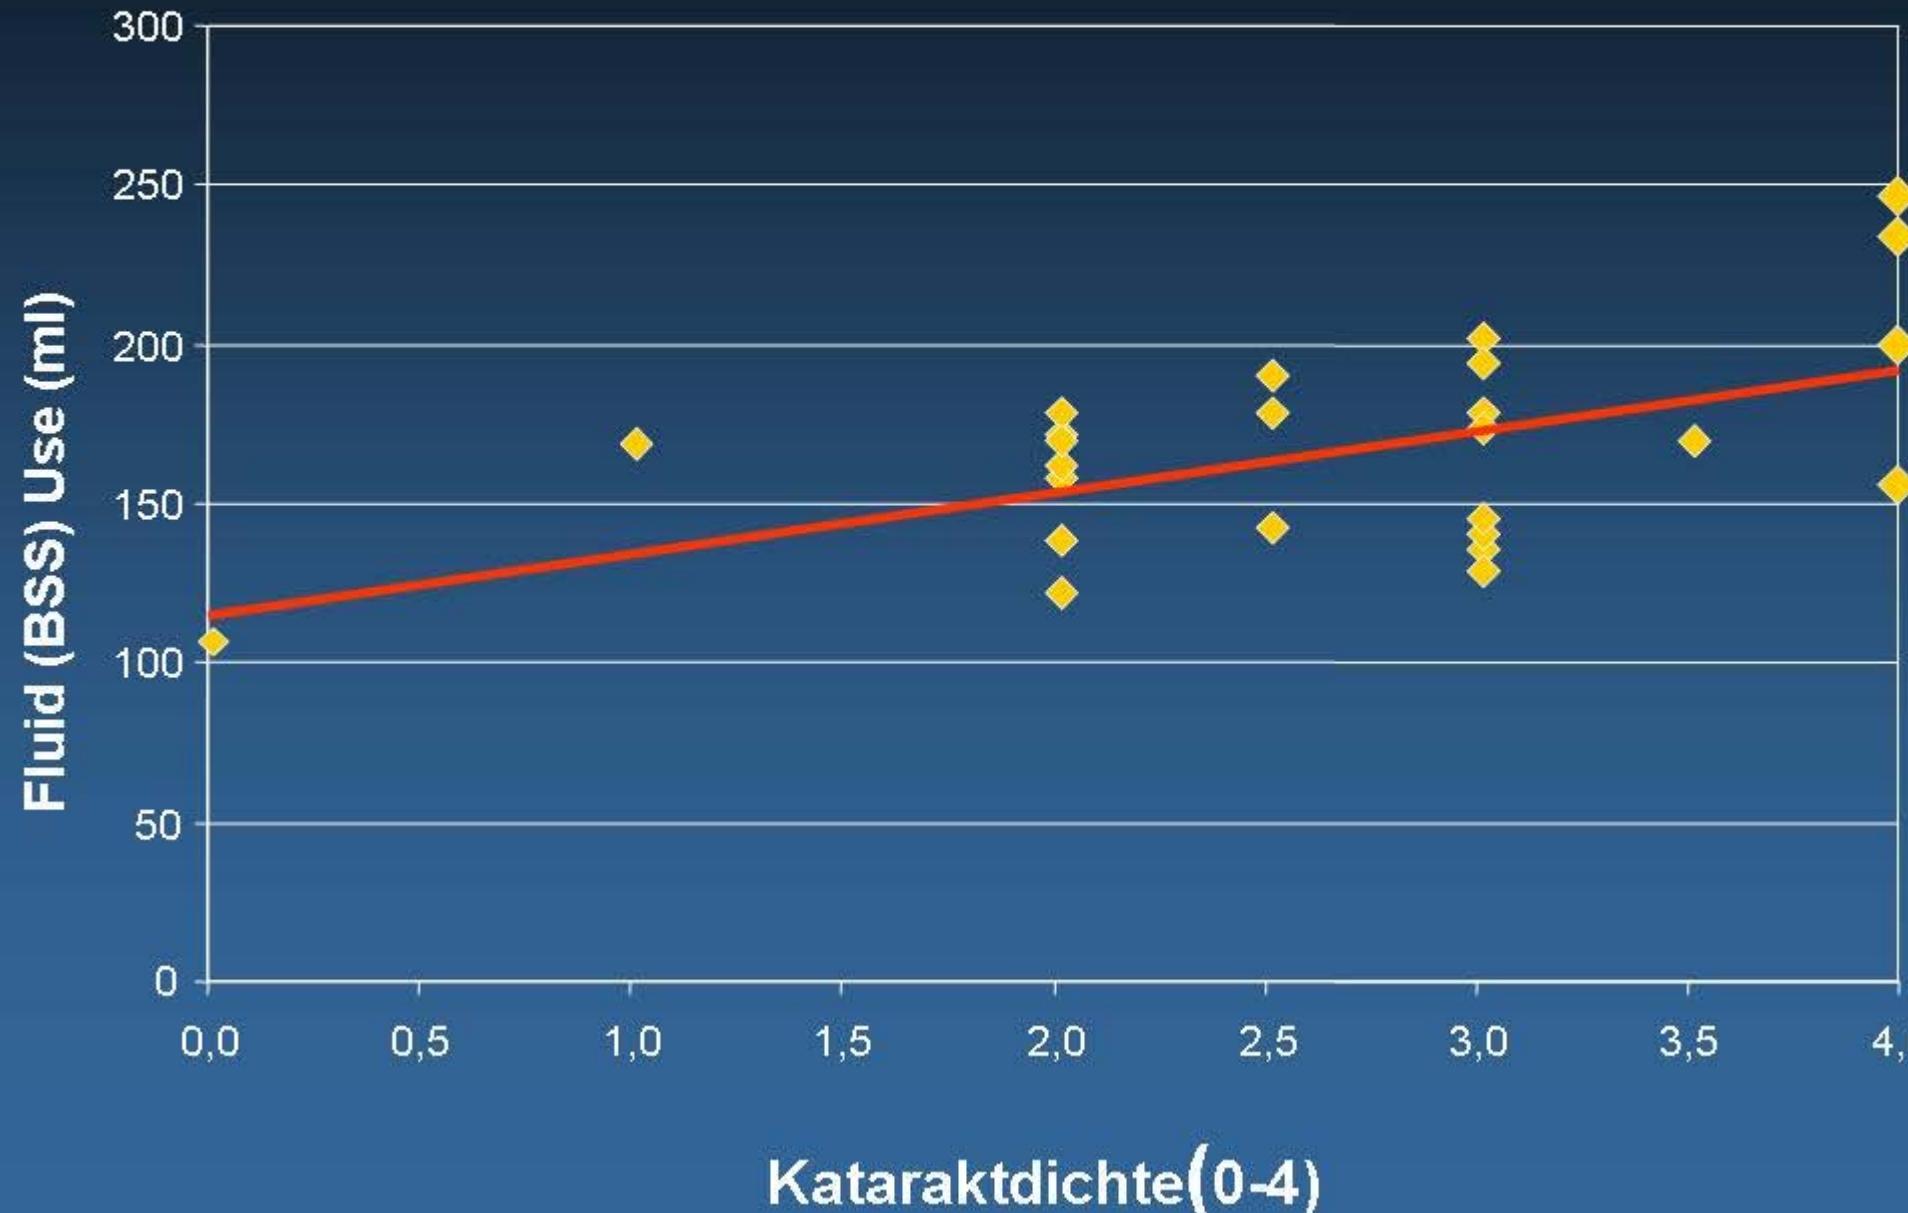

G.U.Auffarth

Flüssigkeitsverbrauch und Kat-Dichte

AMO Sovereign ICE

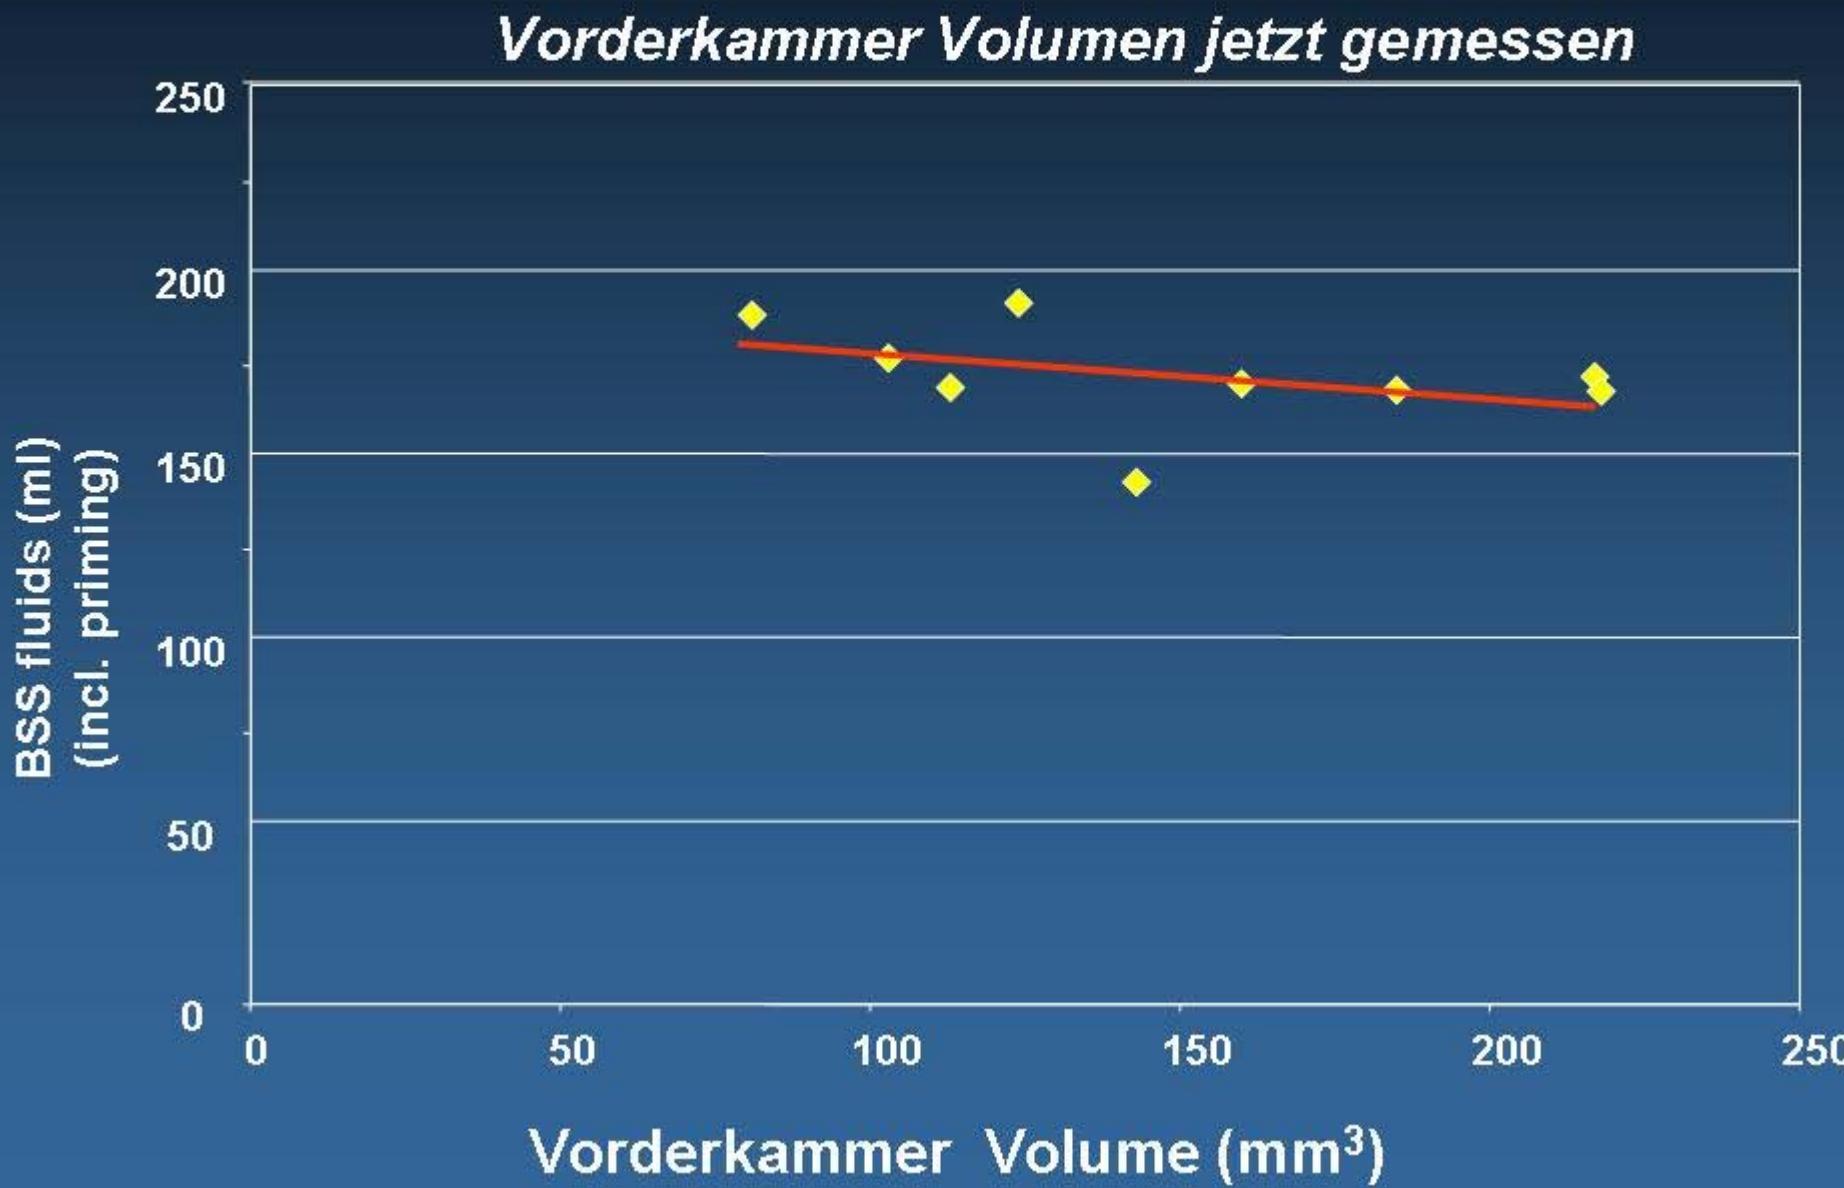

G.U.Auffarth,MD,PhD

Korrelation von Flüssigkeitsverbrauch und VKT

G.U.Auffarth,MD,PhD

ICE/CASE Benefits (Surgeons perspective)

- Reduzierter post occlusion surge
- Sichere Chirurgie bei hohen Vacuun bis zu 550 mmHg und hohem Flow 55ml
- Zunemender Kammerstabilität
- Reduktion der effective phaco time (EPT)
