

Philosophy behind the project Improving standards of care Evidence-based guidelines • Identifying "real world" · Measuring and collecting data outcomes related to · Knowing your own results preoperative status Comparing own data over time • Identifying risks for adverse and anonymously with others outcomes • Identifying what's good and · Evaluating indications for what needs to be better surgery and timing of · Making changes if needed surgery

•

"Some is not a number, soon is not a time" Measurements - Documentation - Collecting data Revelation comes only to the prepared mind

Benefit of EUREQUO versus your present information technologyPaper records	 Electronic follow up system for monitoring outcomes Knowing your own results Comparing outcomes over time and with others anonymously
• Electronic records	 Knowing your own results Comparing outcomes over time and with others anonymously
• Electronic follow up system	• Comparing your outcomes with others anonymously (surgeons, country, Europe)
